

# Testimonial

*There are plenty of background investigation companies, but there are few bespoke all-source intelligence collection and processing teams I will rely upon for serious items. When I have had the opportunity to compare Divine Intel and other providers on the same target the difference has been stark.*

*Divine Intel poked holes through what appeared to be state-level covers and personas. The other organizations were blind to the malicious actors giving them a clean bill of health.*

*Because of this I have been able to confirm the presence and active engagement of state-level actors within critical efforts. I was able to appropriately mitigate the situation thanks to Divine Intel.*

*Divine Intel isn't cheap, they aren't cookie cutter, and they definitely aren't what professional actors (e.g. governments, agencies, handlers, agents, insiders, ...) want you using as a resource... this is precisely why I love them.*

~Peiter "Mudge" Zatko

## We Find Answers

# Digital Reconnaissance

# Drone Surveillance

# Adverse Information Removal

## Mid-Range Drone Surveillance

Need to supplement your surveillance services?

We can provide a cyber-hardened mid-range drone and **an FAA certified pilot** who can testify.

We have modified the device to remove any ability to “phone home” to foreign entities.

Monitoring static and mobile point targets

Pattern of life collection + analysis

Aerial searches + surveys

Legal collection + analysis

Multi-spectral collection + analysis

Thermal collection + analysis

4K HDR Video

## Digital Hunting & Social Network Analysis

### Partnering with Private Investigators

Let's face it, nobody becomes a private investigator (PI) to sit behind a desk, yet PIs are asked to dig through online data, social media accounts, and find the needle in the haystack. This is where we come in. We are your “**private investigator geek squad**” turning the smallest data point into exploitable information to:

Map/Mine Social Networks

Find Hidden Accounts

Discover Personas

Identify Anomalous Behavior

Examine Websites & Digital Infrastructure

We also have relationships allowing us to provide **international investigation support**, and go hunting in multiple languages.

## Organizational SWOT Analysis & Business Intelligence

### Strategic Intelligence

is actionable intelligence (not data or information) necessary to create, implement, and continually improve a strategy, playing a critical role in **risk mitigation, business growth, and security**. We partner with our customers to identify their Strategic Intelligence needs and provide the research support to meet those needs.

### Mergers and Acquisitions

**Uncover risks** not reflected in ledgers: geographic threats, discrepancies in assertions, timelines that do not add up, inaccurate claims of skills/experience, behaviors unbecoming of leadership, etc. We uncover who really owns a company and other hidden risks.
